MEET IN THE MIDDLE

In hockey, the center line is where both teams meet to greet each other and prepare to face off. Right there at center ice, on that center line, smack in the middle.

We like to think of Center Line as a beer that brings people together in much the same way. No matter what team you're on, whether you're a huge craft beer fan or a macro-person through and through, everyone can meet together and enjoy this beer. Then of course you can go back to hitting the boards.
